

## Age Factor Table

The age factor is a percentage determined by your age in years and months on the last day of the month in which your retirement is effective. The age factor is increased by a career factor of 0.2 percent if you have 30 or more years of service credit on the day you retire.

The age factor equals 2 percent at age 60.

From age 55 to 60, the factor is reduced by 0.01 (one one-hundredth) of a percent for each month or fraction of a month in which you are under age 60. For example, if you are

age 55 and six months when you retire, your age factor is 1.46 percent.

Between ages 60 and 63, the 2 percent age factor is increased by 0.033 of a percent for each quarter year of age the member is over age 60, up to a maximum age factor of 2.4 percent.

If you qualify for the 0.2 percent career factor by having at least 30 years of service credit, you reach the maximum age factor of 2.4 percent at age 61 and six months.

*Note: You must have 30 years of service credit to retire between the ages of 50 and 55.*

## Career Factor

If you have 30 or more years of service credit, add 0.2 percent to the age factor on the chart above. The maximum age factor with the career factor is 2.4 percent.

Example:	Age	Without Career Factor	With Career Factor	
	61 - 3 mos.	2.167%	2.367%	
	61 - 9 mos.	2.23%	2.400%*	* Maximum age factor
